

Warm Up-

Graph each on your white board.

$\frac{2}{3}, 3, 1$        $3, 1, \frac{2}{3}$

slope:  $\frac{1}{1}$

$$y = x$$

$$y = 3x$$

slope:  $\frac{3}{1}$

$$y = -\frac{2}{3}x$$

slope:  $\frac{2}{-3}$

## Warm Up-

Fill in the following tables given each of the equations.

1.  $y = 2x + 1$

x	y
-1	
0	
1	

2.  $y = -x + 2$

x	y
-1	
0	
1	

3.  $y = -3x - 1$

x	y
-1	
0	
1	

So far, all the lines you have graphed have been in the form:

$$y = mx$$

Starting today, the lines you are going to graph will be in the form:

$$y = mx + b$$

The  $m$  is the slope of a the line

The  $b$  is the y-intercept

Graph the line

$$y = 2x - 1$$

Slope:  $\frac{2}{1}$

★ y-intercept: (0, -1)

Graph the line

$$y = -3x + 2$$

→ Slope:  $\frac{-3}{1}$

y-intercept: (0, 2)

Graph the line

$$y = -x - 2$$

Slope: \_\_\_\_\_

y-intercept: (\_\_, \_\_)
